Work Experience

Temporary Employee

Pegatron-Jeffersonville, IN

April 2023 to June 2024

It was working with computers I mostly work on the scanning the computers in and checking to make sure that the computer was not damaged and if it was damaged would market as damaged and put it in a special location. I was there for a full year as a temp my supervisor liked me because I did my job reason why I did not work out because they had an hiring freeze and they were short work.

Temp

Peopleready-Elizabethtown, KY

January 2018 to December 2021

Work in warehouses like scanning in products assembly line work picking and packing all those were temporary so they were just send me for like day jobs and then the similar line I did mostly manufacturing for like welding and assembling parts.

Repair Agent

Geek Squad-Brooks, KY

July 2021 to September 2021

I repair laptops Took them apart I would also find out what was wrong with the computer and then I would take it apart order the part in the computer then I would wait for the part to come in and then I would take the part and install it and then I would run test to make sure that the computer runs properly, then clean the computer and then put it to get ready to be ready for pack

Welder

METALSA STRUCTURAL PRODUCTS-Elizabethtown, KY

August 2015 to October 2018

I work in the pressed and Made the F150 frame and Welded on the frame I was a good worker and paid really good attention to details
